PROFESSIONAL SUMMARY

Full Stack Developer with 4+ years of experience building scalable ERP and SaaS applications. Strong expertise in RESTful API development, database optimization, payment gateway integration, Agile development, and high-concurrency systems.

Experience

Code brigade Network January 2022 - PRESENT
Full Stack Developer *Mohali, Punjab*

- Spearheaded the end-to-end development of a customized ERP system for educational institutions, catering to the needs of over 250 schools.
- Guided a cohort of 5 software engineering interns through full-stack development lifecycle, raising code quality scores in peer reviews by 35% and improving team morale.
- Optimized MySQL database queries, reducing page load times by 15% and enhancing overall application performance.
- Revamped existing data models, which cut down data redundancy by 8% and enhanced the overall efficiency of data retrieval processes for the development team.
- Leveraged AI tools and Large Language Models (ChatGPT, GitHub Copilot) to enhance coding productivity, debug complex issues, and optimize development workflows.

ChalkERP July 2021 - December 2021
Software Engineer Intern *Mohali, Punjab*

- Functioned as a Full-Stack Developer, actively involved in the creation of 'ChalkERP,'an extensive ERP system designed for comprehensive University management using PHP
- Implemented automated testing techniques, including Unit and Mock testing, to boost test coverage by 30% .
- Demonstrated a keen eye for detail and dedication to delivering high-quality, scalable software products.

Projects

Education Management System | *PHP, CodeIgniter, jQuery, Ajax, MySQL*

- Oversaw the examination module for a software serving 500,000 users, managing a team supporting 80,000 concurrent app users.
- Designed and optimized robust payment gateways, integrating advanced technologies for secure financial transactions.
- Specialized in creating efficient solutions for CSV upload functionalities, ensuring seamless data handling and processing.
- Designed and developed a scalable RESTful APIs using CodeIgniter framework resulting in improved system, efficient, seamless communication between application and enhanced overall performance.

Learning Management System | *C#, Asp.net, Blazor, jQuery, Ajax, MySQL*

- Addressing story-based problems, brainstorming solution, and developing feature that meet user requirements
- Checked client code for bugs and weaknesses using approved troubleshooting methods
- Contributed to the adoption of agile methodologies, utilizing kanban and improved team productivity through iterative development cycles

Technical Skills

Languages: PHP, Javascript, Python, C#
Technologies: ASP.NET, Blazor, React.js, Laravel, CodeIgniter, jQuery, Xunit, Bootstrap
Operating Systems: Linux (CLI proficient - bash scripting, server management, file operations)
Concepts: API Development, Networking (TCP/IP, HTTP, DNS), Compiler, Operating System, Virtual Memory, Cache Memory, Encryption, Decryption, Database Normalization, Agile Methodology
Tools: Git, AI/LLM tools (ChatGPT, GitHub Copilot), VS Code

Education

Chitkara University August 2017 - July 2021
Bachelor of Engineering in Computer Science (CGPA:7.74)
